

## Quick Start Guide

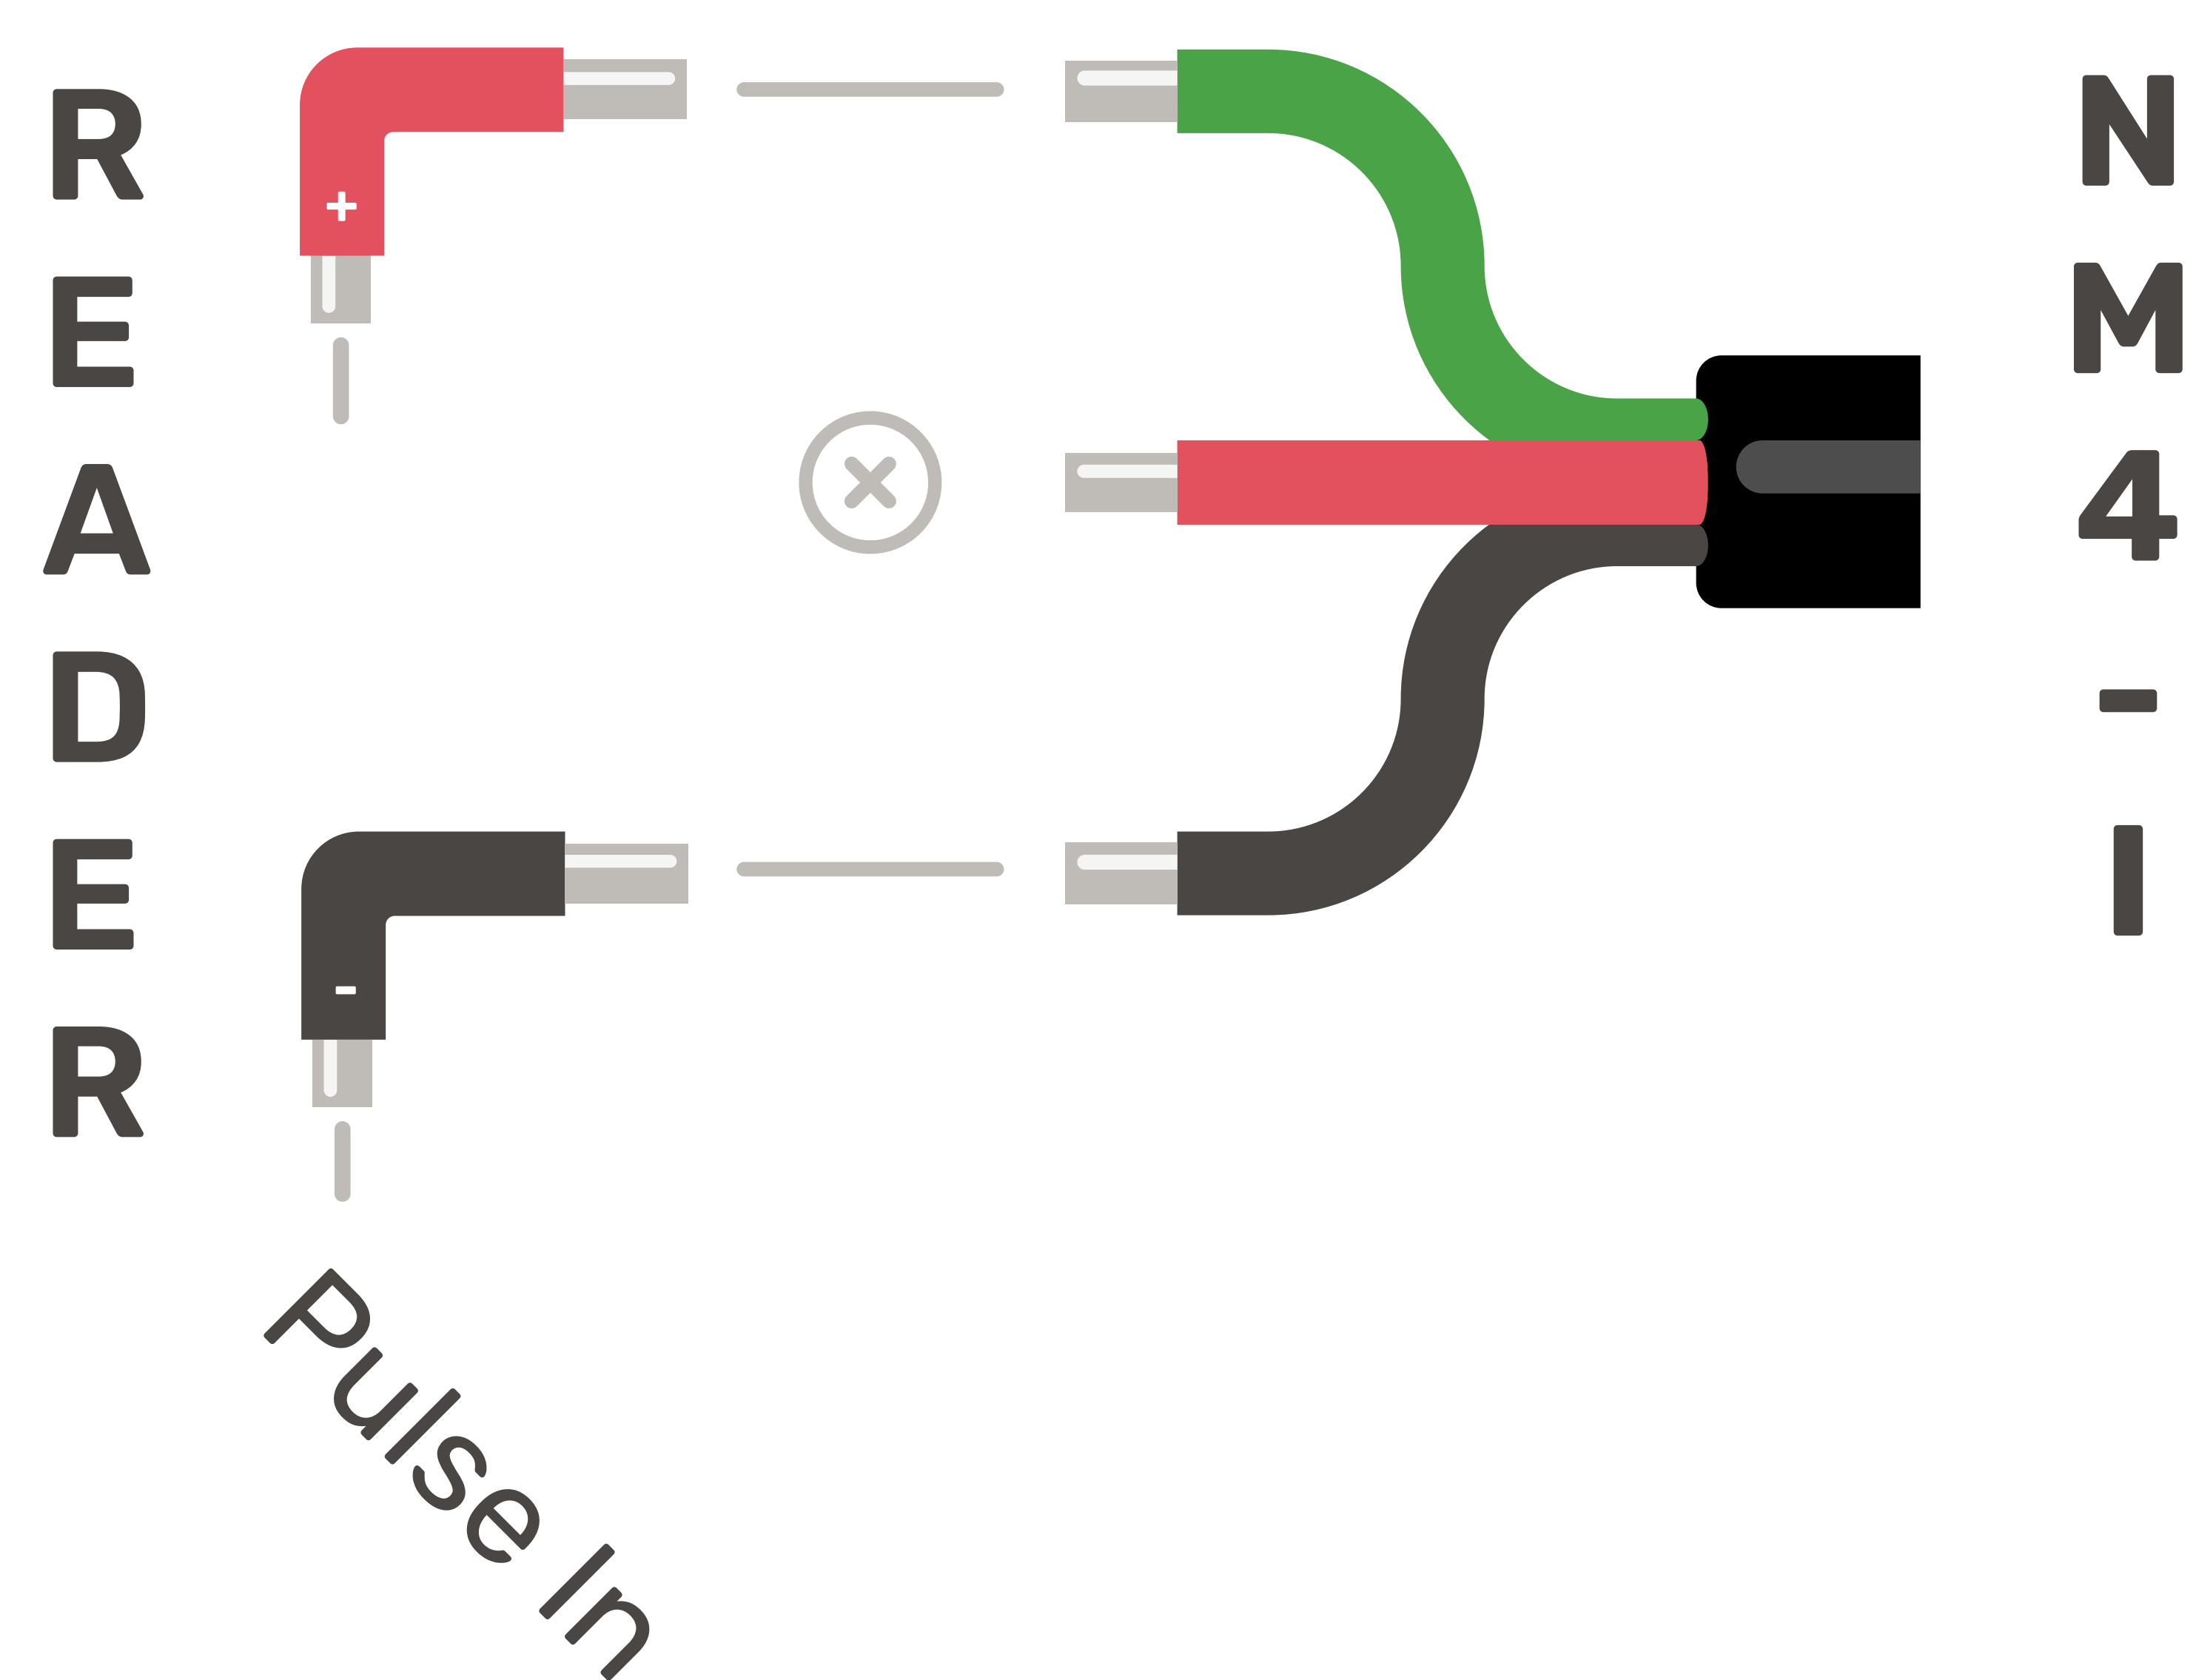

The Meter Out Cable allows for a secure and waterproof connection between the NextMeter and a secondary pulse or encoded reading device.

- 1) Connect or splice bare-wire ends to the reading device.
- 2) Insert the connector into the NextMeter.
- 3) Verify successful reading on the secondary device.

## Recommended Accessories

# Field Splice Kit

Consider getting a Field Splice Kit if you need to connect your NextMeter 4 to an external NextCentury transceiver or 3rd Party Transmitter.
